Service
 · 2 free services
 · Annual maintenance contract directly from the company.

Solar Roti Rolling Machine

Karnataka is one of the states where roti is a staple meal. Handmade rotis are often supplied in abundance to small shops, dhabas and kahanawaalis. Mechanized production increases the output multifold, preserves hygiene and increases business opportunities which translates to an increase in income.

SELCO's Solar Powered Roti making machine is an integration of simple and efficient technologies to increase your roti making capacity. It combines extensively tested PMDC motor that drives the roti rolling machine. This machine is powered by an optimally designed Solar Power system and comes in two different configurations with respective roti output capacities.

Application:

- Roti Rolling for
- Home run units
 - Self Help Group operated units
 - Kahanawalis/Commercial Establishments

Salient Features:

- Increase in daily production capacity
- Uniform roti quality
- Uninterrupted power supply
- Reduced effort
- Efficient
- Hygienic process
- Easy to maintain

Indicative Packages

Output Capacity (Roties per day)	Module (Wp)	Battery (Ah)	Charge Controller (A)
500	40 (12V) (2 units)	60 (2 units)	10 (1 unit)
1000	150 (24V) (1 unit)	80 (2 units)	10 (1 unit)

About SELCO:

SELCO India is a pioneering and internationally acclaimed social enterprise established in 1995 to provide reliable, affordable and sustainable energy solutions to under-served households and organisations especially in the rural areas.
